Chapter 68: Inner World's Army In 100 Years Time

To calculate the army growth of Lumiel, Umbrios, and Drakion (the lesser Absolutes) inside the Inner Worlds over a span of 100 years outside the Inner Worlds, we apply the same principles of time dilation, where 1 year outside corresponds to 365 years within the Inner Worlds.

Growth of Forces in 100 Years Outside the Inner Worlds

Since 1 year outside = 365 years inside, 100 years outside = 36,500 years inside. The forces inside the Inner Worlds will grow at an exponential rate as they undergo this time dilation.

Here is the breakdown of the forces within each of the lesser Absolutes' armies, following the same exponential growth structure as in the previous example.

---

1. Lumiel's Army of Light (Luxoria Eterna)

Growth Over 36,500 Years Inside (100 Years Outside):

Celestial Archons

Starting Total: 10,000

Growth Over 36,500 years: 3.65 million per year

Total Growth:

Final Total: 133.725 billion

Luminara Knights

Starting Total: 1 billion

Growth Over 36,500 years: 365 billion per year

Total Growth:

Final Total: 13.3 quadrillion

Lightborn Legion

Starting Total: 100 billion

Growth Over 36,500 years: 36.5 trillion per year

Total Growth:

Final Total: 1.33 quintillion

Seraphim Riders

Starting Total: 5 million

Growth Over 36,500 years: 1.825 billion per year

Total Growth:

Final Total: 66.7 billion

---

2. Umbrios' Shadow Legion (Umbra Nexum)

Growth Over 36,500 Years Inside (100 Years Outside):

Shadow Warlords

Starting Total: 50,000

Growth Over 36,500 years: 18.25 million per year

Total Growth:

Final Total: 666.125 million

Ebon Knights

Starting Total: 500 million

Growth Over 36,500 years: 182.5 billion per year

Total Growth:

Final Total: 6.67 quadrillion

Nocturnal Stalkers

Starting Total: 10 billion

Growth Over 36,500 years: 3.65 trillion per year

Total Growth:

Final Total: 1.33 quintillion

Nightshade Beasts

Starting Total: 2 million

Growth Over 36,500 years: 730 million per year

Total Growth:

Final Total: 26.6 billion

---

3. Drakion's Draconic Host (Drakarys Aeterna)

Growth Over 36,500 Years Inside (100 Years Outside):

Draconian Overlords

Starting Total: 20,000

Growth Over 36,500 years: 7.3 million per year

Total Growth:

Final Total: 266.5 million

Flameborn Legionnaires

Starting Total: 1 billion

Growth Over 36,500 years: 365 billion per year

Total Growth:

Final Total: 13.3 quadrillion

Skybound Wyverns

Starting Total: 100 million

Growth Over 36,500 years: 36.5 billion per year

Total Growth:

Final Total: 1.33 quadrillion

Infernal Titans

Starting Total: 1 million

Growth Over 36,500 years: 365 million per year

Total Growth:

Final Total: 13.3 billion

Summary of Total Growth:

---

1. Lumiel's Army of Light:

Celestial Archons: 133.725 billion

Luminara Knights: 13.3 quadrillion

Lightborn Legion: 1.33 quintillion

Seraphim Riders: 66.7 billion

2. Umbrios' Shadow Legion:

Shadow Warlords: 666.125 million

Ebon Knights: 6.67 quadrillion

Nocturnal Stalkers: 1.33 quintillion

Nightshade Beasts: 26.6 billion

3. Drakion's Draconic Host:

Draconian Overlords: 266.5 million

Flameborn Legionnaires: 13.3 quadrillion

Skybound Wyverns: 1.33 quadrillion

Infernal Titans: 13.3 billion

Total Force Growth in 100 Years Outside the Inner Worlds:

In 100 years outside the Inner Worlds, the Lesser Absolutes' armies grow into truly unimaginable numbers, reaching trillions and quintillions of troops across their respective forces. These armies are now far larger than before, serving as a testament to the unparalleled scale of growth within the Inner Worlds. Despite the overwhelming expansion, their strength remains contained, ensuring that their vast numbers serve as a tool for maintaining the balance and stability of their realms.
